

CleanFreak® 'Flood Master' - Portable Flood Pumper & Extractor

Item# CPL-CF-FM

Large Coverage Area for Hard Floors

This portable flood pumper extractor can pump out liquid, sludge and solids up to 1/2" in diameter at a rate of 30 gallons per minute. There is a rust-proof stainless steel basket located just inside the body, where the recovery hose enters the tank to trap all solids and hold them for later removal. With the 50 foot recovery host, 50 foot dump hose, and 12" squeegee wand, this flood pumper has the largest possible coverage area of any of our flood restoration dump out extractors. It has a 3-stage vacuum motor and has a pump flow rate of 3000 gallons per hour. It's one of the highest rated flood pumpers on the market! And you can use the extractor as a typical extractor with a 10 gallon capacity and dump valve off the rear of the machine.

Product Features:

- ✓ Includes 50' recovery & 50' discharge hose
- ✓ 143" water lift
- ✓ Includes 12" double squeegee
- ✓ Pumps out up to 50 gallons per minute
